Randy, thanks for helping with this split sampling event! I've established the attached ASR with our lab for the split samples, at least for the analytes our lab can do (VOCs and metals). There is a START TO in the works for TestAmerica in Earth City, MO (just a mile or two from the site) to do the radiological analyses. I'll give you the particulars on that once I hear from Roy Crossland and START. I'll also forward the list of wells I want split and the contact info for the PRP's sampling crews shortly. Call with any questions.

Sincerely,

Daniel R. Gravatt, PG

Principles and integrity are expensive, but they are among the very few things worth having.
